*As a companion to Latitude,*

this collection of batiks brings a lush, saturated and beautiful global palette to your sewing projects. What I love about batiks is the way the process is visible in the finished fabric – from the hands of the artisans who interpret my designs to layers of color applied in the flowing water of the dye baths. The irregularity of the prints themselves is a celebration of imperfection and connects the spirit of creativity across continents and into your sewing space...and heart.
