

Rosemary Cottage

by camille roskelley

Perhaps a result of a lifetime of living in the mountains and the desert, it's always been a dream of mine to build a little cottage near the ocean. There's just something about the salty air, the weathered cedar shingles, and beautiful climbing flowers and vines that will always have my heart. And in true east coast tradition, I even know what I would name her. Rosemary Cottage.

This fabric collection is what I imagine when I think of Rosemary Cottage. Lots of vintage finds and classic pieces mixed together in beautiful blues, linens, and soft pinks and greens. It's the perfect combination for coastal quilts that will leave you dreaming of rose covered cottages too.
